25-Year Sentence On Murder Charge

Wm. Stamps, 21, Pleads
Guilty Friday; Trial
Was Set For Tomorrow

A murder trial scheduled to begin tomorrow was canceled Friday morning when John William Stamps, 21-year-old Granite City, pleaded guilty to the fatal shooting of Lorina Oliver, 31, Granite City, Nov. 3 of Fourth street and Madison avenue.

A 25-year prison sentence was ordered by Judge Joseph Assistant State Attorney John Gitchell. The past record of the defendant, an ex-convict, was considered in the sentencing, it was announced.

Stamps, 21, had been held without bail in the county jail since the day of the slaying. He was indicted five weeks ago on a charge of armed robbery on Chouteau Street, where he was caught red-handed.

The guilty plea and sentencing were held at the General Steel Castings Corp., which has a detailed presentation of evidence. Motive for the crime has not been established, with Stamps telling authorities, "I was born to be a killer."

Also announced Friday were temporary shutdowns at two other General Steel plants: the General Steel Castings Corp., which closed Friday for one or two weeks, and A. O. Smith Corp., which will be shut down during the weekend.

A spokesman for General Steel Casting Corp. said no substantial increases in employment are expected at the two plants.

The firm employs about 1200 production workers.

The St. Louis-based company has been operating from General Steel's temporary shutdowns.

A portion of one plant is causing a temporary shutdown at the St. Louis plant, St. Louis, and the other plant is also closed.

Mr. Edwards is a long-distance truck driver, and he and his wife have two other children, Connie Marie, 13, and Donald, 10.

Mr. White is employed at General Steel Castings Corp. He and his wife have three other children, Ricky, 4½, Diana, 3½, and Sandra, 1½.

The mortally wounded steelworker was found by police a few minutes later lying in the middle of Madison avenue.

Four police officers responded to the scene about an hour and a half later at St. Elizabeth Hospital.

Mr. Steinbauer, works manager, said the plant should reopen in one or two weeks.

General Steel Castings Corp. is the largest employer in the city.

Steinbauer said only a skeleton crew worked Friday to ship

SICL SEEKS KERNER'S AID IN TAX FIGHT

320 Fehling Road
Granite City, Ill.
Governor Otto Kerner
Honorable Sir:

I have been following with alarm your revelations about the financial crisis which confronts the state. I am sure that most of my fellow citizens share with me a deep concern about the terrible need for immediate tax relief to keep our state financially solvent.

During your explorations to determine how additional tax revenue will be raised, I would like to point out that the citizens are siphoning millions of precious dollars from our state. The process is called "tax avoidance" — called City Earnings and State Income Taxes which are levied on wages earned by Illinois residents who work in our five neighboring states.

Besides the burdensome cost of these tax gimmicks, the victimized residents do not receive compensation commensurate with the taxes paid. In addition, direct taxes are voted by these residents without their having a voice in the right of against the levies, and without their having a duly elected representative to look after their interests . . . in other words, "taxation without representation."

Here on the Illinois side, the Granite City, St. Louis, Metropolitan Area, visionaries have organized to fight to eliminate these costly and compromising tax grabbing gimmicks. We have been instrumental in the Illinois Citizens' League to attain the collective strength that will be needed to repel the Missouri tax raids against our Side.

A precedent setting league victory would derive state wide benefits that millions of additional dollars would be brought home from bordering states to be spent and taxed in Illinois, thus somewhat bolstering our economy. The lightening of burden of additional taxes. For this reason, we feel that all citizens in Illinois have a stake in the league's efforts to combat this terrible abuse of "the power to tax" constitutes the right to tax.

We are therefore hoping that, in the days to come, we will take a forthright and impressive stand with us in forming the battle lines to stop the tax raids across our borders.

Respectfully yours,
David L. Gant,
Chairman, Pub. & Publ.
Relations Committee,

ASKS IF CITY ELECTION WILL BE 'BATTLE OF SEXES'

Granite City Press-Record

Dear Corky:

It seems to me that there will be an interesting competition for the vacant aldermanic positions on the Granite City-Council. Let us hope that the good folk in Granite City's tax-payer will come out of it.

Will there be a battle of the sexes?

I earnestly hope Granite City's electorate is going to give the ladies once a chance. Especially a very strong breeze is blowing from the direction of "R&B" street. I believe the Miss Charmbude is the name. Apparently a very bright lady and I hope she can catch the drift of the lot of them. If she does, she would come out of her shell a little bit so the voters could appreciate her capabilities better. I believe we could have an excellent chance to participate in the deliberations of the city's lawmakers.

I had the opportunity to read several of her letters, in your Press-Record as well as in the Post-Dispatch and Globe-Democrat. I envy her fine letter-style. I am sure she is a good writer, often with the opinions expressed therein. But I do believe the electorate would appreciate it if she would write a short, simple biography of herself. You see, the average voter, before he makes up his mind to vote for someone, likes to know a good deal about him. If she does, she would come out of her shell a little bit so the voters could appreciate her capabilities better. I believe we could have an excellent chance to participate in the deliberations of the city's lawmakers.

I have the opportunity to read

Election Should Not Stampede Cities On Pollution Treatment

An advisory election on pollution abatement probably will take place April 4, but it need not stampede all areas into endorsement of the East Side Levee and Sanitary district as the agency to handle the entire project.

Pollution must be abated, and studies planned in Granite City and Venice will help determine which approach will be most economical for those cities. Granite City industrial sewage already is underway and will provide information helpful in reaching a decision.

The election will not be binding but, on the other hand, public approval will not be necessary either later on should the levee trustees decide to adopt a revenue bond issue resolution. If the "straw vote" is favorable, there is likely to be a move for a bond issue, at least on its own to construct treatment plants throughout the area within its boundaries.

There is little doubt that the levee district will be going into the abatement business; this is because there are sections in the district that cannot be served by municipal treatment plants. Also, East St. Louis and Madison officials are record in requesting the levee board to arrange for abatement of their cities.

While the district is destined to establish treatment plants, it seems to us that cost and responsiveness to the people's needs should remain the determining factor in guiding each city. Repeated "guesstimates" that the levee plan would be cheaper are irrelevant, in fact, there is no widespread public feeling that this is the case. It has been given ample consideration in some past projects of the district. Since bonds will be paid from sewer service charges against each affected property owner, instead of by district-wide taxes, it is conceivable that both the levee district and cities can build treatment plants without duplication.

The pollution studies should prove enlightening on what course to follow. Until their results are known, particularly the amount of industrial waste that can be eliminated, voters and officials may be "flying blind."

'Shortage' of Industrial Sites Difficult To Believe

A speech by a St. Louis Chamber of Commerce official is interesting because of his assertion that there is a shortage of metropolitan area industrial sites and that this could curtail future economic development.

The area described — attractive, reasonably-priced sites, at a waterfront and within railroad switching lines — seems remarkably close to what is available in abundance at the local port. There is plenty of land for new firms locating in this region or for existing companies wishing to expand. The Illinois Metropolitan Area lies well within the geographical confines of the two-state metropolitan area, and it is well positioned to go its own way unless area-wide cooperation becomes a two-way street. Further development of the local harbor industrial section can benefit St. Louis as well as the Quad-Cities, but its progress is hardly aided by public statements that good industrial sites are lacking.

Professional, moon lighter or what you say Corky, the average voter likes to know these things, even the candidate's age should be a matter of military service if the candidate happens to be a man.

So I hope the candidate for Granite City school board would have much easier going if she would reveal to the voter a little bit of the things qualifying her for public office. For instance, writing a letter of general nature does not suffice, no matter how nice they are composed. If you will permit me to take a guess at who she is, I would say she is in government employ, and the style of her letters seem to indicate. Party affiliation, (again based on her published letter) is the "Democrat." The former an asset, the latter? I am afraid may prove a handicap here in Granite City. Nevertheless, I am looking forward to reading a lot more of this fine writer and might even vote for her if I were living in her precinct. I would like to see the letter of the NMS also, a considerable value to students for selecting their careers or planning their course in high school and thereafter.

The tests are given each year as part of the nation's largest independent scholarship program. Awards are granted on the basis of merit, granted, but student financial needs determine the size of individual stipends, renewable annually. The NMS also, a considerable value to students for selecting their careers or planning their course in high school and thereafter.

After the test, each participating student will receive an interpretive folder that reports individual test results for each student with scores of high school students across the country. Thus, they learn their educational strengths and weaknesses, and are better prepared to attend college.

In addition to the NMS grants established in 1955 by the Ford Foundation and the Carnegie Corp. of New York, about 115 industrial corporations, foundations, and individuals give scholarships through NMS. Many other agencies utilize its services in awarding scholarships.

purchased without the use of any tax money. The inhibitor truck in the fire department was also purchased without any tax money. This inhibitor has always saved lives and the use of people.

During the 1946 fire, there was a critical break in the outlet sewer. Mr. Moerlenn deputed the labor to the Granite City Engineers and succeeded in convincing them that it was their liability, therefore, to pay the taxpayers an estimated one hundred thousand dollars.

Mr. Moerlenn has a record of honest efficient ability and we hope to have him as our next mayor.

Sincerely,
ROBERT RHOADES,
Former Alderman.

The gown was floor length in a sheath design with a back lace-edges, panel and a lace-trimmed sash.

The portrait neckline was trimmed with French Alencon lace and iridescent sequins, and the long tapered ends ended in bows on the hands. A double-tiered waist-length veil of illusion was attached to a Brussels lace-trimmed crystal crown. White phitoileopterous orchids and a green gumbum composed the bridal bouquet.

Reverend Marcus spoke briefly on the subject of the Cub Scouts and their parents of Scout Sunday. He invited the cubs and their parents to attend the services at the sponsoring church.

Ken Gray, right, organizer of the St. Louis football team, showed pictures of the offensive tactics used by the team in a 1961 game with the New York Giants, which St. Louis won 23 to 16.

Later, Gray held a question-and-answer session in which the cubs asked questions about him and football in general.

Gray, who is a native of Texas, now is a Granite City resident. He is a member of the St. Louis Cardinals three years.

Mrs. Jane Underwood, chairman of the banquet, and the cubs and their parents were in making the centerpieces and place cards. The floral centerpiece of the speaker's table consisted of green gladiolus and blue statice.

Rephard announced that a window display in the Bellmore Sports Goods store was to be sponsored by Kenneth Campbell and his sons, and said the next pack meeting will be Feb. 24 at Nameoki grade school.

Institute Challenges Pupils To Higher Academic Goals

The Mark Twain Summer Institute, in which the Granite City school district has been participating, is proving helpful in stimulating outstanding students toward higher academic accomplishments, it is concluded in a just-released annual report.

The 348 students who completed the 1960 session included two representing Granite City high school, Howard Helman and Richard K. Knobell.

At Clayton high school each summer, the two-year-old institute is an outgrowth of a day school started by a former Francis V. Lloyd Jr. for an educational institution to supplement the efforts of secondary schools in meeting the needs of academically able students.

New Teaching Techniques

A part of the original program was to originate in such a program, the teachers would have a unique opportunity to explore and develop teaching techniques by which able students could learn.

In addition, an "intern-teacher" program was developed to train qualified secondary school teachers in entering and remaining in the teaching profession.

In 1960, applications were received from 625 students of 81 schools, and 100 students screening test was given to 522. Seventy-eight of the applicants had attended the 1959 session and were not required to take the test again, and 25 had made changes in plans before the test date.

Half of those tested scored at or above the 72nd percentile of the independent school norms for their grade levels, and 129 had scores at or above the 90th percentile. Total enrollment totaled 358, including eighth through grade students from 37 public, private, and parochial schools.

Cite Need For Program

A summary in the 1960 report says the latest session reaffirmed the conclusion reached at the close of the first session that such a program is needed.

Corporation Franchise Fees, Taxes Up 1961

After setting an all-time high record last year, collection of corporation franchise fees and taxes got off to a head start in January being \$28,921,45 greater than the January 1960 total. Secretary of State Charles F. Carpenter announced today at Springfield.

Total collections for the month were \$140,828.00.

For the same period, organization of new corporations is 58 below last year's mark, Secretary Carpenter said. There were 771 new Illinois corporations chartered in January last year, and 126 out-of-state corporations issued certificates of authority to do business in Illinois, an increase of eight.

In the not-for-profit field, 150 Illinois organizations were granted charters, an increase of 13, and two out-of-state groups issued certificates of authority, the same number as last year, Carpenter said.

3 County Offices Show Balances of \$123,818

Figures released last week by Madison County Auditor John L. Kraynak showed \$123,818 was hand in three county departments for the month period ending Nov. 30, and a \$60 deficit in the auditor's office.

Dan W. McGehee, county treasurer and ex-officio supervisor of assessments, showed net excess of \$105,308 for his department.

The report of the circuit clerk's office was given by Eugene Bergman, who reported that in Nov. 30, Bergman's report disclosed \$3047 in "excess fees."

James F. Chapman, recorder of deeds, showed excess fees, except for operating expenses of his department of \$14,862.

The only deficit was in the county coroner's office of Dr. W. W. Bunting. The coroner's office can be made up during the present six-month period, it was explained. Operating costs amounted to \$6000 while the total deficit amounted to \$10,330.

The report from Sheriff George Musso is being audited and will be presented to the board of commissioners for approval Feb. 21 at a meeting in the court house.

25,000 Good Turns By Scout Council To Aid Disabled

"By bringing together at Mark Twain a sizable number of able students, it is possible to offer courses and educational opportunities that are of particular interest to those who are able to offer because of the very small number of students with ability and interest in one field," the report read.

"The action and interaction of those, who are alike in having ability and interest to learn at the same time, produce a wide diversity of special talents that is most conducive to stimulating intellectual growth, and, in addition, has become a reality and not just a possibility."

"Most significant by-products for the Mark Twain students are the opportunity of associating and working with other able students in a class taught by an able teacher and through a very desirable and thoughtful introspection, which is illustrated by the following statement from a student questionnaire:

What Student Interests

"MSTC has been a strengthening influence in many respects. My high goals seem to have been more attainable and my limitations have been overcome. It has widened my interests through widening my interests in subjects and human relations."

"Last, and most important of all, it has clearly shown my abilities in various endeavors, which I had not expected to have or the reverse. I consider this statement as being the most stimulating and well-spent period of my high school years."

The 1960 curriculum included chemistry, German, Russian, Greek, English, biology, modern mathematics, behavioral science, physics, economics, civics, history, political philosophy, experimental zoology and reading.

John F. Lernen is director and Morris Glaser president of the board of directors. Among the board members is Russell D. Johnson, assistant director of instruction in the Granite City school district.

Glover New Red Cross Field Representative

D. W. "Del" Glover has been assigned as new field representative for this region of Illinois. It was announced today. His duties will include supervision of the local Red Cross chapter.

Glover will be assisted by Mrs. John Douglas, who is going to be the new chapter's capacity.

Former basketball star at the Paris, Ill., high school and Bradley University, Glover is now a school athletics coach before joining the Red Cross staff.

He was a Red Cross assistant field director in the Far East. He also coached service teams in his spare time.

The report from Sheriff George Musso is being audited and will be presented to the board of commissioners for approval Feb. 21 at a meeting in the court house.

MEMO: TO BUSINESSMEN --

When you remodel - rewiring

--IT'S GOOD BUSINESS

Your uses for electric service have probably doubled in the last decade, so the wiring in your building may have been out-of-date for many years. Skimpy, old-fashioned wiring just can't deliver the full power needed for modern lighting, office machines, power tools and air conditioning.

The cheapest time to rewiring is when you remodel. So be sure your local electrical contractor is called in right at

the start of your remodeling job. His expert recommendations for modern adequate wiring will provide plenty of electric power to help your business prosper and grow.
